The Master's Degree or Licentiate course in Educational Psychology trains psychologists who are experts in psychopedagogical operations, both within and outside schools. It enables graduates to offer consultancy and guidance to individuals, groups, and institutions involved in educational and school processes; analysis, planning and management of both human and environmental resources, aimed at prevention and finding solutions for individual and group issues.

Career opportunities
At the end of the course graduates will be able to offer the following activities:

- consultancy and support, both individually and jointly, in social and educational institutions and schools, to teachers, to individuals during their developmental years and to parents, in both the public and private spheres;
- training for teachers, social workers and parents in order to strengthen the resources for developing individuals;
- psychological assessment, both diagnostic and preventive, through the application and interpretation of psychodiagnostic techniques to improve communication and educational processes;
- educational and vocational guidance for students and parents;
- prevention of difficulties encountered in schools and support for teachers and parents;
- supporting processes of development, learning and socialisation both within and outside school.

Those obtaining the Master's Degree in Educational Psychology, after taking the State Exam, can enrol in Section A of the Register of Psychologists, allowing them to freely practice professionally and offer consultancy in public and private institutions.
They may also move onto specialisation courses, Level II Master's courses and PhDs, depending on the prescribed regulations for admission to these courses.
